Claims Amendments for entry by Examiner:

1. (Currently Amended) A method of designating items as available to share in a computer system between a sharer that makes items available and a sharee that views the items that were made available comprising:

executing on the sharer's computer a query comprising a scope and a criteria, wherein the scope and the criteria are submitted by the user of the sharer's computer, and wherein the scope defines at least a portion of a physical storage location;

creating on the sharer's computer a dynamic list with a plurality of referenced items based on results of said query, wherein the referenced items include electronic files and electronic folders, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list;

defining the contents of one or more virtual folders on the sharer's computer based on the dynamic list, the one or more virtual folders configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying and pasting,

making the contents of the one or more virtual folders available for sharing with the sharee, thereby making the results of said query available to the sharee; and

sharing at least a portion of the one or more virtual folders with the sharee such that the sharee is provided with access to the referenced items from the sharee's computer.

2.-7. (Canceled)

8. (Original) The method of claim 1, wherein when the sharer is unable to grant access to the sharee for an item, a notification is provided to the sharer.

9. (Original) The method of claim 1, wherein the sharer is able to limit the type of access that the sharee has to the items.

10. (Currently Amended) A method for sharing items on a computer system comprising:

receiving permission to access a list on the sharer's computer with referenced items, wherein the referenced items are based on the results of a query that includes a scope and a criteria provided by the sharer executed on the sharer's computer, and the list defines the contents of one or more virtual folders on the sharer's computer, and wherein the scope defines at least a portion of a physical storage location, and wherein referenced items include electronic files and electronic folders;

in response to receiving the permission to access the list, accessing the list and the referenced items that have been determined by the sharer's computer to be shared in a sharing format, the sharing format being ~~one of a static list and a~~ dynamic list, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is

removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list; and

wherein the one or more virtual folders are configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying, and pasting.

11. 14 (Canceled).

15. (Original) The method of claim 10, wherein when access to an item is unavailable, a notification is provided.

16. (Original) The method of claim 10, wherein the permission to access the list specifies the type of access that is available for the items.

17. (Currently Amended) One or more computer-readable storage media for enabling a computer-program segment to communicate with one or more other computer-program segments, said media comprising:

a set of computer-usable instructions that cause a request to provide access to a set of items to be communicated to one or more other computer-program segments capable of executing said request, wherein the set of items include results of a query having a scope and criteria provided by the sharer executed on the sharer's computer, and wherein the results are included one or more virtual folders on the sharer's computer, wherein the scope defines at least a portion of a physical storage location, and wherein the set of items include electronic files and electronic folders; and

wherein the one or more virtual folders are configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying, and pasting, said referenced items are determined by the sharer's computer to be shared in a sharing format, the sharing format being ~~one of a static list format and~~ a dynamic list format, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list.

18.-21. (Canceled)

22. (Original) The media of claim 17, wherein when access to an item is unavailable, a notification is provided.

23. (Original) The media of claim 17, wherein the access to the items may be limited to be one of read/write or read only.

24. (Currently Amended) A method of communicating between a sharer of a dynamic list and a sharee comprising:

receiving, from the sharee, a call for accessing, on a computer of the sharer, items that are referenced on the dynamic list, wherein the list is based on results of a query with a scope and a criteria provided by the sharer executed on the sharer's computer referenced in one or more virtual folders on the sharer's computer, and stored on the sharer's computer, and determined by the sharer's computer to be shared in a sharing format, wherein the sharing format is ~~one of a~~

~~static list format and a~~ the dynamic list format, wherein the scope defines at least a portion of a physical storage location, and wherein the sharer items include electronic files and electronic folders;

responsive to authorization received from the sharer, providing the sharee access to the items in the determined sharing format, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list; and

wherein the one or more virtual folders are configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying, and pasting.

25.-28 (Canceled)

29. (Original) The method of claim 24, wherein when access may be unavailable to an item, that is on the list when the list is shared, a notification is provided to the sharer.

30. (Original) The method of claim 24, wherein the sharer is able to limit the type of access to the items.

31. (Currently Amended) One or more computer-readable storage media for enabling a sharer to share a set of items that are referenced on a dynamic list with a sharee comprising:

a set of computer-usable instructions that allow the sharee to access the items directly through the sharer's computer, wherein the items include electronic files and electronic folders,

wherein the set of items referenced on the list are based on results of a query with a scope and a criteria provided by the sharer executed on the sharer's computer, wherein the scope defines at least a portion of a physical storage location, and wherein the dynamic list comprises an order of the items referenced on the dynamic list, the dynamic list is referenced in one or more virtual folders on the sharer's computer, the dynamic list is determined by the sharer's computer to be shared to the sharee in a sharing format, the sharing format being ~~one of a static list format and a~~ the dynamic list format, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list, and the one or more virtual folders are configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying, and pasting.

32.-34. (Canceled)

35. (Original) The media of claim 31, wherein the type of access that is provided to the items may be one of read or read-write.

36. (Currently Amended) A method for sharing items in a computer system between a sharer and a sharee comprising:

executing on the sharer's computer a query comprising a scope and a criteria provided by the sharer, wherein the scope defines at least a portion of a physical storage location;

creating on the sharer's computer one or more virtual folders with a plurality of referenced items based on results of said query, wherein the referenced items include electronic files and electronic folders;

determining a sharing format of ~~the~~ a list to be shared to the sharee, wherein the sharing format is ~~one of a static list and a dynamic list~~, wherein when an item that is on the dynamic list has a property change such as that it no longer meets the criteria of the query, the item is removed from the dynamic list, and wherein when an item that was not previously on the dynamic list has a property change such that it meets the criteria of the query, the item is added to the dynamic list;

sharing the one or more virtual folders with a sharee such that the sharee is provided with access to the referenced items from the sharer's computer in the determined sharing format; and

wherein the one or more virtual folders are configured to be manipulated by an action of at least the sharer, said manipulation is at least one of dragging, copying, and pasting.

37. (Canceled)

38. (Previously Presented) The method of claim 37, wherein when the sharer removes items from the virtual folder, the sharee is no longer provided with access to the items.

39. (Previously Presented) The method of claim 37, wherein when items are added to the virtual folder, the sharee is provided with access to the added items.

40.-42. (Canceled)

43. (Currently Amended) The method of claim 1, wherein the creating step comprises defining within the dynamic list an order of the plurality of referenced items.

44. (Currently Amended) The method of claim 1, wherein the creating step comprises defining within the dynamic list an annotation corresponding to at least one of the plurality of referenced items.

45. (Currently Amended) The method of claim 10, wherein the dynamic list comprises a predefined order of the referenced items.

46. (Currently Amended) The method of claim 10, wherein the dynamic list comprises an annotation corresponding to at least one of the referenced items.

47. (Currently Amended) The method of claim 24, wherein the dynamic list comprise a predefined order of the referenced items.

48. (Currently Amended) The method of claim 24, wherein the dynamic list comprises an annotation corresponding to at least one of the referenced items.

49. (Previously Presented) The method of claim 1, wherein the sharee is provided with remote access to the referenced items from another computer.

50. (Currently Amended) The method of claim 10, wherein accessing the dynamic list and the referenced items is performed remotely from another computer.

51. (Previously Presented) The computer readable medium of claim 17, wherein the request to provide access comprises a request to provide remote access from another computer.

52. (Previously Presented) The method of claim 24, wherein providing the sharee access to the items comprises providing the sharee remote access to the items.

53. (Previously Presented) The method of claim 24, wherein the receiving step comprises receiving the call via an API.

54. (Previously Presented) The one or more computer readable media of claim 31, wherein the set of computer-usable instructions allow the sharee to remotely access the items.

55. (Previously Presented) The method of claim 36, wherein the sharing setup the sharee is provided with remote access to the referenced items.
